

§ 143B-135.172. Restrictions on project works on natural or scenic river.

The State Utilities Commission may not permit the construction of any dam, water conduit, reservoir, powerhouse transmission line, or any other project works on or directly affecting any river that is designated as a component or potential component of the State Natural and Scenic Rivers System. No department or agency of the State may assist by loan, grant, license, permit, or otherwise in the construction of any water resources project that would have a direct and adverse effect on any river that is designated as a component or potential component of the State Natural and Scenic Rivers System. This section shall not, however, preclude licensing of or assistance to a development below or above a designated or potential component. No department or agency of the State may recommend authorization of any water resources project that would have a direct and adverse effect on any river that is designated as a component or potential component of the State Natural and Scenic Rivers System, or request appropriations to begin construction of any such project, regardless of when authorized, without advising the Secretary in writing of its intention to do so at least 60 days in advance. Such department or agency making such recommendation or request shall submit a written impact statement to the General Assembly to accompany the recommendation or request specifically describing how construction of the project would be in conflict with the purposes of this act and how it would affect the component or potential component. (1985, c. 129, s. 2; 2015-241, s. 14.30(f).)
